Office Action Summary		1	Application No.	Applicant(s)	Applicant(s)				
			10/685,387	FUJINO ET AL.					
		Ē	Examiner	Art Unit					
			Roy K. Potter	2822					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1)	Responsive to communication(s) filed	on .							
2a)□									
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is								
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Dispositi	on of Claims								
4)🖂	4)⊠ Claim(s) <u>1-30</u> is/are pending in the application.								
•	4a) Of the above claim(s) is/are withdrawn from consideration.								
5)⊠	5)⊠ Claim(s) <u>9,10,17,23,24,29 and 30</u> is/are allowed.								
6)⊠	s)⊠ Claim(s) <u>1-8,15,16 and 18-22</u> is/are rejected.								
7)🛛	7) Claim(s) <u>11-14 and 25-28</u> is/are objected to.								
8)□	8) Claim(s) are subject to restriction and/or election requirement.								
Applicati	on Papers								
9)	The specification is objected to by the	Examiner.							
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.									
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).									
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).									
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Art Unit: 2822

DETAILED ACTION

Claims 1 – 30 are pending.

Claim Rejections - 35 USC § 112

Claims 4 – 8 and 18 - 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4 and 18 recite, beginning in line 4, that "wherein an entire area of a chip is swept while overlap of regions of a unit area determined by a manufacturing process is allowed". This is not clearly understood.

Claims 5 and 19, which depend on claim 1 and 15 respectively, recite that there is an increase in the rate of reduction of the number of contacts when the spacing is increased is varied according to the size of the contact array. This claim is not clearly understood as the number of contacts in the array of the integrated circuit recited in claim 1 is constant and does not vary. Claim 6 - 8, which depend on claims 2 – 4 respectively, are not clearly understood for the same reason, as are claims 20 – 22.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 4, 15 – 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Nguyen.

Nguyen, U.S. Patent No. 5,477,933 discloses an electronic device interconnection technique. As shown in Figure 2, semiconductor integrated circuit 11 has a contact array comprised of solder balls 12. The solder balls 12 are aligned in a vertical direction and a horizontal direction. The contact spacing in at least one of the horizontal or vertical direction is larger than a spacing determined by a manufacturing process, as a process could not be used to produce spacing smaller than it is capable of producing. The spacing must inherently be at the limit or larger.

Claim 3, beginning on line 4, recites "product by process" claim language. The applicant should note that such claim language is directed to the product per se and applicant cannot rely on process language to patentably distinguish the product.

Claim 4 recites that the number of contact in an area "is not more than a predetermined value". This limitation merely recites that the number of contacts in an area has a numerical relationship with a smaller number, and would be inherent.

Allowable Subject Matter

Claims 9 – 10, 17, 23 - 24 and 29 – 30 are allowed.

The prior art does not teach or suggest the recited divided contact array of claims 9 – 10 or the method of making it recited in claims 23 - 24

The prior art does not teach or suggest the method recited in claim 17 including first and second contact arrays with a shift.

The prior art also does not teach or suggest the recited odd and even numbered rows with the shift of a half pitch recited in claims 29 – 30.

Claims 11 - 14 and 25 - 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not teach or suggest the longitudinally laminated layers of contact arrays recited in claims 11 – 14 or the method used to make the array recited in claims 25 – 28.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy K. Potter whose telephone number is 571 272 1842. The examiner can normally be reached on M-F.
